ECO Lighting Technology and Solutions

JS LED Technology Corporation is a fast-growing US company dedicated exclusively to designing and distributing high quality LED products in the commercial and residential lighting and signage industry since 2005.

We fully stock our products in California and Texas. Our products are certified by UL, ETL, DLC, ES, Title 24 etc.

We can also work with you to develop OEM lighting products according to your desired requirements and specifications.

We have production factories managed by Shenzhen Lighting Technology Corporation located in China, Cambodia and Vietnam.

Our factories specialize in the manufacturing and design of LED light fixtures and lamps.

We have many production lines with advanced automated assembly areas in our factory.

Our Quality Control Department follows strict guidelines to ensure that our final products are up to your standards.

We're known mostly for selling industrial and residential lighting products.

Some of our most popular products include panel lights, troffer lights, down lights, area lights, canopy lights, high bay lights, flood lights, wall packs and many others.

THE AREA LIGHT

APPLICATION

COMMERCIAL AND RESIDENTIAL PARKING LOTS
ALONGSIDE ROADWAYS
SHOPPING CENTERS AND
ENTERTAINMENT VENUES

High Brightness Output:
The Area Light provide high brightness illumination, ensuring safety in nighttime or low-light environments.

Energy Efficient and Eco-Friendly:
These fixtures have low energy consumption, effectively reducing electricity costs, and are free of harmful substances, meeting environmental standards.

Weather Resistant:
The Area Light are typically designed to be waterproof and corrosion-resistant, making them suitable for various weather conditions.

LED UFO HIGH BAY

APPLICATION

COMMERCIAL AND RESIDENTIAL PARKING LOTS
ALONGSIDE ROADWAYS
SHOPPING CENTERS AND
ENTERTAINMENT VENUES

High Brightness and Wide Illumination:
LED UFO high bay lights provide high brightness output and wide illumination angles, suitable for spaces with high ceilings.

Energy-Efficient Design:
These fixtures are designed for high energy efficiency, significantly reducing energy consumption and electricity costs.

Long Lifespan:
The lifespan of LED UFO high bay lights typically reaches tens of thousands of hours, reducing the frequency of replacements and maintenance costs.

LED WALL PACK

APPLICATION

BUILDING EXTERIOR,
PARKING LOT
WALKWAY AND ENTRANCE LIGHTING

Weather Resistant:
LED wall packs are typically designed to be waterproof and corrosion-resistant, making them suitable for outdoor use.

Energy Efficient:
These fixtures are designed for high energy efficiency, effectively reducing energy consumption and electricity costs.

Flexible Installation:
LED wall packs offer versatile installation options, allowing for different mounting heights and angles as needed.

LED CANOPY LIGHT

APPLICATION

GAS STATION,
COMMERCIAL BUILDING ENTRANCES
PARKING LOTS AND GARAGES

High Brightness Output:
LED canopy lights provide high brightness illumination, suitable for various outdoor and semi-outdoor environments

Weather Resistant:
These fixtures are typically designed to be waterproof and corrosion-resistant, capable of withstanding harsh weather conditions.

Energy-Efficient Design:
LED canopy lights are designed for high energy efficiency, effectively reducing energy consumption and electricity costs..

LED FLOOD LIGHT

APPLICATION

OUTDOOR EVENTS,
CONSTRUCTION SITES
SPORTS VENUES,
BILLBOARD LIGHTING,

- High Energy Efficiency:**
LED Flood Lights have lower energy consumption, which can save on electricity costs.
- Long Lifespan:**
LED Flood Lights typically have a lifespan of over 25,000 hours, reducing the frequency of replacements
- Waterproof Design:**
Many LED Flood Lights come with waterproof ratings, making them suitable for outdoor use
- Easy Installation:**
LED Flood Lights are typically designed for easy installation, suitable for various settings

LED PANELS

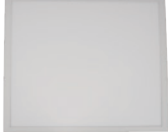

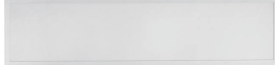

APPLICATION

OFFICE LIGHTING,COMMERCIAL SPACES
CONFERENCE ROOMS,HOME LIGHTING
HOSPITALS AND SCHOOLS

- Ultra-Slim Design:**
LED Panels are typically designed to be very slim, saving space and making installation easy
- High Color Rendering:**
LED Panels provide a high Color Rendering Index (CRI), ensuring colors appear true to life
- Energy-Efficient and Eco-Friendly:**
LED Panels are energy-efficient, reducing energy consumption and meeting environmental standards.
- Flicker-Free Technology:**
Many LED Panels use flicker-free technology, protecting the eyes and reducing visual fatigue
- Multiple Color Temperature Options:**
LED Panels offer various color temperature options to suit different lighting needs in various settings.

LED EXIT LIGHTS

APPLICATION

COMMERCIAL BUILDINGS,SCHOOLS,
HOSPITALS,SHOPPING MALLS,
PUBLIC TRANSPORT FACILITIES

High Energy Efficiency:
LED Exit Lights have low energy consumption,
allowing them to operate for extended periods without frequent replacements.

Long Lifespan:
LED Exit Lights typically have a lifespan of over 50,000 hours, reducing maintenance costs.

High Visibility:
LED Exit Lights provide high brightness and clear lettering,
ensuring they are easily recognizable in dark environments.

Emergency Power Supply:
Many LED Exit Lights come with emergency power supplies,
allowing them to function during power outages.

Multiple Installation Options:
LED Exit Lights support various installation methods,
such as wall-mounted or suspended, to suit different location requirements.

LED TROFFER

APPLICATION

COMMERCIAL OFFICE SPACES,CLASSROOMS
HOSPITAL CORRIDORS,RETAIL STORES,
CONFERENCE ROOMS

High Energy Efficiency:
LED Troffers have low energy consumption, effectively reducing electricity costs.

Long Lifespan:
LED Troffers typically have a lifespan of over 50,000 hours,
reducing the frequency of replacements.

Even Light Distribution:
LED Troffers provide even light distribution, reducing shadows and glare.

Easy Installation:
LED Troffers are designed for easy installation, suitable for various ceiling types.

Dimmable Options:
Some LED Troffers feature dimmable options, allowing brightness adjustments as needed.

LED LINEAR STRIP

APPLICATION

Factories, warehouses, and workshops
supermarkets, parking lots,
and shopping malls

Slim Design:
LED linear strips are typically designed to be ultra-slim, making them easy to install in tight spaces and saving room.

High Energy Efficiency:
These fixtures are designed for high energy efficiency, effectively reducing energy consumption and electricity costs.

Dimmable Functionality:
Many LED linear strips support dimming functionality, allowing users to adjust brightness as needed.

T8 TUBE

APPLICATION

Office lighting,
commercial retail
industrial environments

Energy Efficient:
T8 tubes are more energy-efficient compared to traditional fluorescent tubes, effectively reducing energy consumption and electricity costs.

Long Lifespan:
The lifespan of T8 tubes typically reaches tens of thousands of hours, reducing the frequency of replacements and maintenance costs.

High Compatibility:
T8 tubes are often compatible with existing fluorescent fixtures, making them easy to replace and install.

SLIM DOWNLIGHTS

LED DOWNLIGHTS

APPLICATION

HOME LIGHTING, COMMERCIAL SPACES,
LED DOWNLIGHTS, BATHROOM LIGHTING
EXHIBITIONS AND MUSEUMS,

High Energy Efficiency:
LED Downlights have low energy consumption, effectively reducing electricity costs.

Long Lifespan:
LED Downlights typically have a lifespan of over 25,000 hours,
reducing the frequency of replacements.

Multiple Color Temperature Options:
LED Downlights offer various color temperature
options to suit different lighting needs in various settings.

Flicker-Free Technology:
Many LED Downlights use flicker-free technology,
protecting the eyes and reducing visual fatigue.

Easy Installation:
LED Downlights are designed for easy installation, suitable for various ceiling types.

EXPLOSION-PROOF LIGHT

APPLICATION

Factories, warehouses, and workshops
supermarkets, parking lots,
and shopping malls

Tri-proof Design:
LED tri-proof lamps feature waterproof, dustproof, and corrosion-resistant properties, making them suitable for various harsh environments.

High Energy Efficiency:
LED tri-proof lamps are highly energy-efficient, effectively reducing energy consumption and electricity costs.

Long Lifespan:
The lifespan of LED tri-proof lamps typically reaches tens of thousands of hours, reducing the frequency of replacements and maintenance costs.

LED TRI-PROOF LAMP

APPLICATION

Commercial and residential parking lots
alongside roadways
shopping centers and
entertainment venues

Tri-proof Design:
LED tri-proof lamps feature waterproof, dustproof, and corrosion-resistant properties, making them suitable for various harsh environments.

High Energy Efficiency:
LED tri-proof lamps are highly energy-efficient, effectively reducing energy consumption and electricity costs.

Long Lifespan:
The lifespan of LED tri-proof lamps typically reaches tens of thousands of hours, reducing the frequency of replacements and maintenance costs.

LED LINEAR HIGH BAY

APPLICATION

WAREHOUSE LIGHTING,
INDUSTRIAL FACILITIES, SPORTS HALLS,
RETAIL STORES, PARKING GARAGES

High Energy Efficiency:
LED Linear High Bays have low energy consumption, effectively reducing electricity costs.

Long Lifespan:
LED Linear High Bays typically have a lifespan of over 50,000 hours, reducing the frequency of replacements.

Even Light Distribution:
LED Linear High Bays provide even light distribution, reducing shadows and glare.

Durability:
LED Linear High Bays are typically designed with robust housings, making them suitable for use in harsh environments.

Multiple Installation Options:
LED Linear High Bays support various installation methods, such as suspended and fixed mounting, to suit different location requirements.

LED PANEL FRAME

APPLICATION

OFFICE LIGHTING,
COMMERCIAL SPACES
MEDICAL FACILITIES

Slim Design:
LED panel frames are typically designed to be ultra-slim, making them easy to install in ceilings and saving space.

High Energy Efficiency:
These panel lights are designed for high energy efficiency, effectively reducing energy consumption and electricity costs.

Even Light Distribution:
LED panel frames provide uniform light distribution, reducing shadows and glare, enhancing visual comfort.

ARCHITECTURAL
LED LINEAR FIXTURE

APPLICATION

COMMERCIAL BUILDINGS, OFFICES,
CONFERENCE ROOMS, EXHIBITIONS
MUSEUMS, BUILDING FACADES, AND PLAZAS

Aesthetic Design:
Architectural LED linear fixtures feature a sleek and modern design that can complement various indoor and outdoor environments.

Dimmable Functionality:
Many architectural LED linear fixtures support dimming functionality, allowing users to adjust brightness as needed.

High Efficiency:
These fixtures typically offer high energy efficiency and long lifespan, effectively reducing energy consumption and maintenance costs.

LED SPORT LIGHT

High Brightness Output:
LED sport lights provide extremely high brightness, capable of meeting the lighting needs of various sports activities.

Weather Resistant:
These fixtures are typically designed to be waterproof and corrosion-resistant, making them suitable for use in various weather conditions.

Energy-Efficient Design:
LED sport lights are designed for high energy efficiency, effectively reducing energy consumption and electricity costs while extending lifespan.

DRIVER

High Stability:
LED drivers provide stable current and voltage, ensuring the safety and longevity of LED fixtures.

High Compatibility:
Many LED drivers are designed to be compatible with various types of LED fixtures, making replacement and installation easy.

Protection Features:
LED drivers typically include overload, overheat, and short-circuit protection features, ensuring safe operation of the equipment.

LED STRIP

High Flexibility:
LED strips are typically flexible, allowing them to be bent and cut as needed to fit various installation environments.

Various Colors and Brightness:
LED strips offer a variety of color and brightness options, suitable for different lighting needs and ambiance settings.

Easy Installation:
Many LED strips come with adhesive backing, making them easy to install and remove quickly.

LED MODULE

APPLICATION

OUTDOOR BILLBOARDS AND SIGNS
DISPLAYS, SIGNAGE, AND LIGHT BOXES

Compact and Lightweight:
Small LED modules are designed to be compact and lightweight, making them easy to install and arrange.

High Brightness and Rich Colors:
These modules provide high brightness output and can achieve various colors, suitable for diverse application needs.

Weather Resistant:
Many small LED modules are weatherproof and durable

UP DOWNLIGHT

APPLICATION

HOME LIGHTING
COMMERCIAL SPACES
ART DISPLAY

Dual Directional Lighting:
Up downlights are designed to emit light both upwards and downwards, providing a broader lighting effect.

Energy Efficient:
These fixtures typically use LED technology, offering high energy efficiency and effectively reducing energy consumption and electricity costs.

Modern Design:
Up downlights often feature a sleek and modern appearance, making them suitable for various interior decor styles.

LED MIRROR LIGHT

APPLICATION

BATHROOM,
MAKEUP ROOMS
BEDROOM DECORATION

High Brightness:
LED mirror lights provide high brightness output, ensuring clear visibility under various lighting conditions.

Energy-Efficient Design:
These fixtures are designed for high energy efficiency, effectively reducing energy consumption and electricity costs.

Multiple Color Temperature Options:
LED mirror lights typically offer various color temperature options, allowing users to choose between warm and cool light as needed.

EMERGENCY DRIVER

APPLICATION

EMERGENCY LIGHTING
SAFETY EQUIPMENT

Automatic Switching:
Many emergency supplies feature automatic switching capabilities, allowing for quick transition to backup power during outages.

Long-lasting Batteries:
These supplies are typically equipped with high-performance batteries that can provide sustained power during outages.

High Reliability:
Emergency supplies are designed to provide reliable power support at critical moments, ensuring safety and functionality.

CONTROLLER
AC SWITCH
SENSOR

APPLICATION

LIGHTING CONTROL
LIGHT SHOWS AND EVENTS
SMART HOME SYSTEMS

Multiple Control Methods:
LED controllers typically support various control methods, such as remote control, app control, and voice control, providing a flexible operating experience.

Dimming and Color Adjustment:
Many LED controllers feature dimming and color adjustment capabilities, allowing users to modify the brightness and color of the lights as needed.

High Compatibility:
LED controllers are generally compatible with various types of LED fixtures, making integration and use convenient.

POLE AND BRACKET

APPLICATION

STREETLIGHT INSTALLATION
BILLBOARD SUPPORT
SECURITY SURVEILLANCE

Optional Type: Square/Round/Cone
Available Size: 20/25/30/39FT, 4"/5"/9"

SZ-4R1	SZ-4S1	SZ-4R-1R	SZ-5R-1R	SZ-5S-4S1	SZ-5S1

SZ-3R2	SZ-4S2	SZ-4SR2	SZ-4S3	SZ-4S3Y	SZ-4S4C	SZ-4S3T

SZ-P2	SZ-P3	SZ-P4	SZ-P5	SZ-BL-SP	SZ-BL-RP

Streetlight Installation:
Poles and brackets are commonly used to install streetlights, providing illumination for urban and rural roads to ensure the safety of pedestrians and vehicles.

Billboard Support:
These brackets can be used to support outdoor billboards, ensuring visibility and stability of the advertising content.

Security Surveillance
Poles and brackets can be used to install surveillance cameras, providing security monitoring and surveillance capabilities.

Easy Installation:
These brackets are designed for easy installation and adjustment, accommodating various mounting needs and environments.

Various Specifications:
Poles and brackets come in a variety of heights and sizes to meet the needs of different applications.
